The Yuen Method

Yuen Method's goal is to educate and inform students about this realistic healing method that minimizes the need for drugs, surgery, and long term therapy. By using this methodology, rejuvenation and longevity can be achieved. The Yuen Method is an energetic healing technique that is effective in combating energetic blockages in the body that might be causing pain, disease or anxiety. The principle of the Yuen Method is that your body is either energetically strong or weak. Pain is seen as a symptom of a deeper issue.

In the western world, pain is usually treated with medication and/or physical therapy. Persons experiencing chronic pain more often than not are told to manage and live with their pain or are permanently dependent on pain relief. In the east, pain is seen as a symptom of a deeper issue, a blockage within the flow of energy in their body, causing the manifestation of a physical or emotional condition. Using a blend of ancient Chinese Shaolin temple healing, Qi and Shen Gong, and western health science, the Yuen Method works to make sure that all levels of consciousness are harmonious. It works to remove energy blockages that lie beneath both the muscular and cellular levels of the body.
